THE ASSOCIATION OF THEOLOGICAL SCHOOLS IN THE UNITED STATES AND CANADA

The Association of Theological Schools in the United States and Canada is the primary accrediting agency for graduate theological education. Tracing its origins to 1918 when formal consultations on theological education were begun, the Association now numbers 211 institutions in 1992. They reflect the diversity of the religious communities and university relationships in the two national communities. Its purposes include, within a general mandate for the improvement of theological education, the establishment of standards and the accreditation of institutions, serving as a forum for shared interests, and the consideration of issues among members and between members and related agencies. The Association has maintained a membership list of accredited schools since 1936, and publishes an annual *Directory*.

The officers of the Association for the 1992-94 biennium are:

President
ROBERT E. COOLEY
President, Gordon-Conwell Theological Seminary
South Hamilton, MA

Vice-President
JAMES H. COSTEN
President, Interdenominational Theological Center
Atlanta, GA

Secretary
DIANE KENNEDY
Dean, Aquinas Institute of Theology
St. Louis, MO

Treasurer
ANTHONY T. RUGER

INTRODUCTION

This is the twenty-second annual edition of the ATS *Fact Book*, covering data supplied in the fall of 1991. The present format for the *Fact Book* was initially designed for the 1988 and 1989 version. This year we have added additional tables in response to requests coming into our office. We trust that this format and content will be of service to member schools and others.

Since 1988 data for the *Fact Book* has been submitted on the revised ATS Annual Report Forms required of all member schools. (All member schools always refers to the complete membership, Canadian and U.S., accredited and nonaccredited. When any other group is meant, it will be specified.) These reports include information on enrollment, admissions, administrative staff, and faculty salaries for the current year. They also include graduation statistics, financial reports, fund raising reports, and library data for the previous fiscal year. Per student revenue and expenditure costs are based on the full-time equivalent enrollment as reported by the schools in the previous year and on the audited financial data for that year as reported in the fall of the current year. Some data such as age of enrollment is reported only every other year. As in the past, all salary scales reported have been edited to preserve confidentiality. Any salary data field with only one being reported does not provide any salary information. If two or three are reported, the percentile distribution and median are eliminated to preserve confidentiality of individual salaries.

From the beginning of publication a primary purpose of the *Fact Book* has been to provide information annually on parallel patterns permitting ready comparisons across the years. Most changes over the first 19 years were generally to provide additional information not previously supplied, or to acknowledge changes in educational practice that had occurred. During 1987-88 the Annual Report Forms underwent major revision which not only broadened the scope of data being requested of schools but also refined the data in many categories to provide a more accurate basis for determining trends. This information is of significant help to administrators for purposes of long-range planning. At the same time it is used by the Commission on Accrediting and by visiting teams to monitor a school's progress in relation to common expectations in theological education.

This edition of the *Fact Book* has been prepared by ATS staff and is offered to the ATS membership, as well as to the general public, in the hope that it will be useful to those with responsibility for the management of the theological education enterprise in North America. The work has been done with the strong conviction that management decisions are best made when the persons charged with making them have the widest range of and most complete data available to inform their deliberations.

For a complete history of the revision of the ATS *Fact Book* you are invited to refer to the 1990-91 edition. During the revision process the following norms were established:

(a) The categories of the Integrated Postsecondary Education Data System (IPEDS) report forms or those of Statistics Canada would be used wherever applicable;

(b) The terminology would be that of the *Common Language for Postsecondary Accreditation: Categories and Definitions for Data Collection* (1985, NCHEMS and COPA, Washington, D.C.);

(c) The financial categories for revenue and expenditures would be those of the NACUBO guidelines or of CAUBO, its Canadian counterpart, as far as possible.

The obvious concern was to avoid duplication of work for member schools wherever possible and at the same time to broaden the base for purposes of comparison with other fields. The *Fact Book* includes the data deemed most helpful to schools for planning purposes. The tables are arranged in four chapters: Institutional Characteristics; Enrollment; Personnel Compensation; Finances (Tuition Costs, Revenues and Expenditures).

CHAPTER I: INSTITUTIONAL CHARACTERISTICS

Introduction

The first chapter consists of six tables and one graph which describe member institutions in terms of the most common identifying characteristics derived from the Annual Report Forms in the sections on Institutional Characteristics (IC-1), Enrollment (EF-1), Finances (F-1), Personnel (P-3) and Salary (S-2). The tables are in continuity with the prior ATS *Fact Book* for 1987-88, Tables A, B, and C-1 (pp. 47-84) with the addition of personnel and financial characteristics in the revised editions. These tables provide the best way for schools to do their own comparative analysis. The reader should note the following:

A. Data is for fall 1991 only;

B. Head Count (HC) enrollment is comparable to similar tables in previous editions of the *Fact Book*;

C. Full-Time Equivalent (FTE) enrollment is not comparable to similar tables in previous editions of the old *Fact Book* because the guidelines for computing FTE enrollment were changed starting with the revised Annual Report Forms in 1988 on which these tables are based.

D. In the numerical sequence of tables, some numbers will be missing because tables were selected from the full range of suggested tables to present the most significant data. The sequencing allows for the gradual adding of further tables as recommended by the Data Center Advisory Committee or as requested by the schools.

Table 1.01: Listing of Individual Institutions

This table is an alphabetical list of all member schools which shows the more significant institutional characteristics. Please note that Winnipeg Theological Seminary has changed its name to Providence College and Seminary. Data are derived from the fall 1991 ATS Annual Report Forms with the exception of enrollment which shows both fall 1990 and fall 1991 data. The accredited status of schools is reported as of fall 1991. [Assemblies of God Theological Seminary, Newman Theological College and Providence College and Seminary were accredited in 1992.] The table is based on the Annual Report Forms, Sections IC-1; EF-1; F-1; L-1; S-2; and P-3. For this edition we are including library data for the first time. Volumes include Printed Books/Volumes and Serials/Periodicals from ATS-L-1, p.4, lines 1 and 2, column F. In some instances library volumes include total university resources.

Classifications:

- Accredited status includes the three classes of membership in the Association: Accredited, Candidate for Accredited Status, Associate Member.
- U/I—University/College affiliated or Independent/Freestanding. The classification of "University Affiliated" is restricted to schools of theology which are an integral part of a larger institution which possesses at least two other professional schools or departments at the graduate level. This is a category which has been used for many years to signal the broader level of resources immediately available to those theological schools.
- The location of Province or State is indicated by the use of ATS identifiable abbreviations.
- Denominational codes for the schools are set up on the School Master File when a school applies for membership. A list of denominational codes is found in the appendix to this chapter.
- Current Fund expenditures are taken from the Annual Report Forms, F-1, Part B, Line 14, for Total Educational and General Expenditures, and F-1, Part B, Line 18, for Total Expenditures, but subtracting all non-mandatory ("voluntary") transfers.
- Total Expenditures do include costs of auxiliary enterprises such as housing, food service, bookstore and the like which are not directly supportive of the educational function of the school. (The 1990 table was incorrect in that it excluded lines 11 and 13 of form ATS-F-1B Mandatory Transfers and Scholarships/Fellowships––it is correct for the 1991 year.)
- Full-time and Part-time Faculty are listed as reported by the school on form S-2 (Faculty Salary) and P-3 (Part-time Faculty). The distinction between full-time and part-time faculty is based not on the number of hours or courses taught but rather on whether the salary is contracted on a full-time basis or on part-time availability to the teaching function of the school.
- The Full-time Equivalent Faculty is the sum of all reported full-time faculty plus the sum of the reported percentages of teaching for all part-time faculty divided by one hundred.
- Library Volumes includes (lines 1 and 2 from the Annual Report Forms, L-1, Part D, Column F) Printed Books, Current Serials and Periodicals.
- Head Count is based on total ~~enrollment as re~~ported on the Annual Report Forms, EF-1.
- FTE is based on total FTE as reported on the Annual Report Forms, EF-1.

Table 1.02: Summary of Selected Institutional Characteristics

The table offers data both in number and percentage for several types of schools. It is based on all schools, accredited and nonaccredited. University related schools are those related to a larger institution with at least two other graduate level professional schools or departments. Schools are classified as members of a cluster only if the relationship includes at least two other schools of theology. The clusters in the Association of Theological Schools are listed at the end of the ATS *Directory*. One shift from last year is a result of the University of Winnipeg asking for a reclassification from a denominational school to a non-denominational school. The six primarily Black schools are Hood Theological Seminary, Howard University School of Theology, Interdenominational Theological Center, Payne Theological Seminary, Shaw Divinity School, and Virginia Union University School of Theology. The primarily Hispanic schools are the Dominican Study Center of Bayamon Central University and the Evangelical Seminary of Puerto Rico.

Table 1.03: ATS Membership Structure and Changes

This table reports changes in ATS membership status for the past ten years. The Association has three categories of membership. The category of candidate for accredited membership was initiated in 1980. Candidates are those institutions which after review on the basis of Association procedures and standards have been authorized by vote of the Commission on Accrediting to begin the self-study process leading to an accreditation review. Candidacy status is normally granted for two years. Accredited members are those which after review on the basis of Association standards are elected by the Commission on Accrediting to accredited membership. Associate members are those which have met the criteria for associate membership prescribed by the Association and have been recommended by the Commission on Accrediting and elected by a two-thirds vote of the accredited members. They are not accredited but are assumed to be working towards accreditation. The three categories of membership are described in the ATS *Constitution*, Bulletin 40, Part 1, Article IV, and in the ATS *Procedures, Standards and Criteria for Membership*, Bulletin 40, Part 3. This table reflects 1991 data and does not include the three schools which were accredited in 1992 or the nine new associate member schools.

Table 1.04A: Distribution of Schools by Total Enrollment—Head Count (HC)

This table reports the size of member schools in six groupings based on total enrollment (HC) both full-time and part-time. The data is based on the section on Enrollment of the ATS Annual Report Forms (EF-1). It includes all member schools. The reader will notice that the number of schools reporting enrollment is normally at least four less than the total number of member schools, e.g., as found in Table 1.03. This is because three of the member schools are either part of a larger institution which reports the enrollment—Berkeley Divinity School at Yale, and Bexley Hall at Colgate-Rochester—or a coordinating agency such as the Toronto School of Theology in which all enrollment is reported by the constituent member schools.

Table 1.04B: Distribution of Schools by Full Time Equivalent (FTE) Enrollment

This table reports the same categories of distribution as the previous Table 1.04A but is based on full-time equivalent enrollment (FTE) in which part-time enrolled students are converted to full-time according to the sum of the percentages of full-time student load taken by part-time students, divided by one hundred. Please note that the total number of schools listed at the base of all columns in Table 1.04B is the total number of the member schools reporting positive data for that column, not the total member schools for the Association in that particular year. Table 1.04B reflects the three missing schools above plus the University of Chicago which reported no FTEs.

Table 1.06: Levels of Educational Programs of Accredited Schools

Table 1.06 includes only accredited schools, Canadian and U.S., which have reported degree programs in several major categories. The list follows the terminology of ATS Institutional Standard XIII on Nomenclature, *Bulletin 40*, Part 3. The only exceptions from this nomenclature are those categories which report bachelor's degrees, associate degrees and postbaccalaureate certificates for which the ATS does not offer approval since they are outside the stated scope of the Association as recognized and approved by COPA and the Division of Agency Evaluation of the USDE. The information for the table is derived from the section on Institutional Characteristics (IC-1) of the ATS Annual Report Forms for the fall of 1991. The Master of Divinity or the Master of Religious Education is the first professional degree offered by all member schools with the exception of six which either offer degrees through another member school or which offer doctoral level degrees which are based on and presume the Master of Divinity. Missing from this table are nine schools which did not report. In 1991 we changed degree categories to better address the questions asked of our member schools. This means 1991 categories cannot be compared with the other two columns (prior year, 2 years ago). Prior to 1991 the categories were: D.Min/D.Miss; MA Professional Degree, M.Div/M.R.E. Degree; Ph.D./Th.D./S.T.D./Ed.D.

CHAPTER II: ENROLLMENT

Introduction

The most extensive section of the ATS Annual Report Forms is that on Admissions and Enrollment (A-1, EF-1-6, C-1) which embraces reports on total enrollment (HC) and full-time equivalent enrollment (FTE); on enrollment by age, race, and denomination; and enrollment by specific degree programs. It also includes a report of completions by degree program of off-campus programs, their number and enrollment; and the number of first-year students. For several of these categories, e.g., age of students, 1988 was the first year in which this information was requested. The tables in this section were selected as the most significant. Additional tables will be published in future editions as the computer programs are validated and as sufficient data for trend analysis becomes available. The definitions of the categories have been stated with great care. Together with the categories themselves, the definitions follow as closely as possible those of the *Common Language for Postsecondary Accreditation: Categories and Definitions for Data Collection* (1985 NCHEMS and COPA, Washington, D.C.) and the Integrated Postsecondary Education Data System (IPEDS).

Comparable Data: The 1988-89 through 1991-92 editions of the ATS *Fact Book* offer consistent comparable data. The 1987-88 ATS *Fact Book* offers similar summary data in Tables 1-20, pp. 1-24. The detailed tables on which the summary depends are found in the latter part of the book, Tables C-1 to M, pp. 84-120. Comparable data for the broader community of higher education is readily available in the 1991-92 *Fact Book on Higher Education* prepared by the American Council on Education (ACE/MacMillan, New York). A basis for interesting comparisons will be found especially in their chapters on Enrollment and Earned Degrees.

The reader should bear in mind that the number of schools reporting enrollment data in a given category for the ATS *Fact Book* will be smaller at least by three than the total number of member schools. Of the nonreporting institutions, one is a consortium in which all enrollment is reported by the member institutions; two have become part of a larger institution which reports all enrollment while retaining their corporate identity.

In comparing data prior to 1988, bear in mind the change in the guidelines for the reporting of full-time equivalent enrollment and the fact that the denominational codes were augmented substantially to reflect the diversity of membership in the Association.

Table 2.01: Number of Applications, Acceptances, and Enrollees

This data is reported for the four major degree categories as requested of member schools in the Admissions section (A-1) of the ATS Annual Report Forms. The first column reports admissions for all M.A. programs, academic or professional. The second, for the Master of Divinity program, whether a three- or a four-year program; the third, for the Doctor of Ministry; and the fourth for all other doctorates including the Ph.D., Th.D., S.T.D., Ed.D., D.Miss., and the Doctor of Sacred Music. There is an increase in every category in 1991. The drop in D.Min. enrollees from 1989 to 1990 has now moved back up above the 1989 level by 131 students. The reader must be mindful, however, that the number of schools is not held constant. Comparisons within the Biennium years are potentially more accurate because the number of schools is constant, but even then some schools do not report. Longer term correlations and comparisons of admissions and completions in each major category and between the categories can be helpful to schools in tracking vocational trends. The relation of acceptances to applicants and of enrollees to applicants are of obvious interest to all admissions officers. Patterns in these ratios among denominational seminaries will vary considerably depending on the level and intensity of pre-screening of applicants by the denomination.

Definitions: The acceptance percentage is the number of applicants accepted divided by the number of applicants. The enrollment percentage is the number of acceptances enrolled divided by the number of applicants accepted. An applicant is someone formally requesting admission to a program. Acceptance is formal notification of admittance by the school. An enrollee is a student who actually enrolls after being accepted.

Table 2.03: Admission Policies as Reported Regarding Undergraduate GPA and GRE Scores: Fall 1990

The ATS Annual Report Forms request information in the section on Admission Data (A-1), on the minimum requirements for the cumulative undergraduate grade point average (GPA); and for the Graduate Record Examinations (GRE). The lowest required score, the highest and the average of all reported scores are listed. The grade point average (GPA) is calculated on a four point scale in which A=1, B=2, C=3, D=1. Any GPA reported on a different scale was converted to a four point scale for the sake of the comparative table. The GRE is an entrance test for graduate programs administered by the Educational Testing Service (ETS) of Princeton, NJ. The GRE score reported in this table is the sum of its two parts, the verbal test and the analytical test. Given the low number of schools using the GRE, any analysis is inappropriate.

Table 2.04A: Total Head Count (HC) Enrollment in Member Schools

This table includes all schools, U.S. and Canadian, accredited and nonaccredited. It reports enrollment as a five-year trend. Please note that statistics for 1987 were taken from data submitted in the pre-1988 unrevised Annual Report Forms. The statistics thereafter are derived from data submitted in the fall of each year in the section on Enrollment (E-1) of the Annual Report Forms. The left-hand column reports the number of schools reporting enrollment data for that year. The total enrollment is divided into four categories which reflect three of the major degree programs with all other programs grouped in the fourth category. The M.Div. includes all students reported on EF-1, page 4, as enrolled in a three or four-year Master of Divinity program together with those in comparable nondegree preordination programs on EF-1, page 2, or those reported as interns. Interns are reported as enrolled when the internship is under the supervision of the school and is integral to the completion of the program. The Th.D., S.T.D., and Ph.D. are the traditional academic doctorates which constitute the major source for staffing of the graduate level theological schools. The Doctor of Ministry is the highest level professional degree program.

This year we have an increase in enrollment of 896 students while the number of schools is constant. The largest increases are in programs categorized as "other" and D.Min.

Table 2.04B: Total Full-Time Equivalent (FTE) Enrollment in Member Schools

This table includes all member schools. It will eventually report enrollment on a five-year trend. FTE enrollment statistics from pre-1988 editions of the *Fact Book* are not published because the guidelines for the calculating of FTE students were amended for the 1988 and 1989 ATS Annual Report Forms. The FTE is now calculated by dividing the total number of student credit hours taken by all students in a degree program by the number of credit hours required to be taken each semester to complete a degree in the number of years duration advertised by the school. If a number of students take an overload of courses, the school may well report a higher FTE than head count (HC). Instructions for pre-1988 editions of the *Fact Book* indicated that the FTE should not be higher than the HC. A second change in the guidelines for reporting FTE enrollment was initiated for the fall 1989 Annual Report Forms. In light of the difficulty in calculating full-time equivalency for doctoral level students and in view of the lack of consistency in the way in which schools reported such enrollment, the guidelines now specify simply that for doctoral level students the full-time equivalent equals the head count of students who are actively engaged in course work, projects, and/or dissertation work. Not included are persons paying continuation fees but who are not actively engaged in course work, projects, and/or dissertation work. This means that the number reported as legitimately enrolled by head count for doctoral level programs will be the same as the full-time equivalent number. The higher FTE enrollment in 1990 by comparison with 1989, an increase of 6.99 %, is accounted for entirely by the higher number of FTE doctoral level enrollees. In light of this, it is understandable that the 1989 FTE data and statistics will constitute a new base for trend analysis in succeeding years. Comparing the HC with the FTE of M.Div. students gives one the clearest picture of the impact of part-time students. In the category of "other" we dropped certificate program FTE this year because of the wide disparity of what constitutes a certificate program. Schools, however, have requested that it be reinstituted in 1992. For the sources of the data and the definition of the four categories the reader is referred to the commentary on Table 2.04A which uses exactly the same categories as 2.04B.

Table 2.06: Comparable Enrollments: Same Institutions Reporting—HC

Table 2.06 reports the change in head count enrollment in a given number of member institutions submitting Annual Report Forms for a constant number of years. The first sequence of five years of data from 1985 to 1989 is for the same 191 schools. An analysis of this first sequence is in the 1988-89 and 1989-90 *Fact Book*. 1990 begins the first year of the second sequence of five years with a base of 208 schools. Any schools dropping out before 1995 will be eliminated from all calculations in any subsequent *Fact Book*. Any schools sending in their initial Annual Report Forms after 1990 were not counted in this table, nor is data from schools admitted to the Association at the 1992 Biennial Meeting included.

We propose to track the "same institutions reporting" for up to 15 years and to initiate a new grouping every five years. This purpose will account for the three columns for statistics on Table 2.06. The trend analysis which flows from this table offers an accurate record of the growth or decline of a control group of institutions. Enrollment increase is a small 1.51%.

Table 2.07: Comparison of Total Enrollment—Total Individuals (HC) and FTE

This table provides a four-year trend analysis of the ratio of full-time equivalent to head count enrollment for the number of member schools reporting head count enrollment for that year. The statistics for this table are taken from the total head count enrollment in Table 2.04A and the total FTE enrollment in Table 2.04B. As was explained in the commentary on Table 2.04B, the percentage change in FTE enrollment from 1988 to 1989 was an increase of 3.74% which was occasioned almost entirely by the change in guidelines for the 1989 ATS Annual Report Forms for the reporting of FTE enrollees for doctoral level programs. Starting with that year the full-time equivalent for doctoral level students equals the head count of such students that are actively engaged in course work, projects, and/or dissertation work. The 1990 increase of 6.99% reflects the high number of FTE doctoral level enrollees as well as the increase in the number of schools. With the definitions stabilized the percent change in both HC and FTE enrollment is very slight.

Table 2.10: Total Enrollment by Degree Types—HC and FTE

This table reports the total enrollment both by head count and full-time equivalency for 1990 and 1991 distributed among seven principal categories of programs in which the schools report enrollment on the ATS Annual Report Forms in Sections EF-1 and 2. The changes in the percentage of enrollment in each type of program in relation to total enrollment is a matter of great importance both to the schools and to the denominations for the purpose of long-range planning. Table 2.12 complements this table in reporting both head count and FTE enrollment by the specific degree programs within each category. The statistics for Tables 2.10 and 2.12 are derived from the ATS Annual Report Forms (EF-1) for the fall of 1990 and the fall of 1991. They are based on the data submitted by the schools in the following categories of the enrollment form (EF-1):

- Professional/Academic 1 or 2 years Post-Baccalaureate includes all the M.A. programs listed on page 1 of the EF-1 Report Form.
- Professional 3 & 4 Years Post-Baccalaureate includes all enrollees reported on EF-1, page 2. all columns.
- Professional Post-Baccalaureate Doctoral Programs includes all enrollees reported on EF-1, page 3, columns A through H (D.Min., D.Miss., Ed.D., D.Sac.Music).
- Certificate and Diploma Programs includes all enrollees reported on EF-1, page 4, columns A and B.
- Special/ Unclassified includes all enrollees reported on EF-1, page 4, columns C and D.
- Interns includes all those reported on EF-1, page 4, columns E and F.
- Academic Post-M.A./M.Div. programs includes all those reported on EF-1, page 5, columns A through F (includes Th.M., Th.D., and Ph.D.).

Table 2.12: Enrollment by Degree—HC and FTE

This table reports the enrollment for all member schools for the fall of 1988 through 1991 showing a four-year trend for each degree and each category. The listing follows the order in which the degree programs and other programs are listed in the enrollment section (EF-1) of the ATS Annual Report Forms. Although most categories will be obvious to the reader, the distinction in the M.A. programs is worth noting. The M.A./M.A.R./M.T.S. represents the two-year academic master's level programs which may be research oriented or "general academic" without the focus on research methodology. This reflects the fact that some seeking a master's degree of this kind will be preparing for doctoral level work whereas others will have a variety of reasons for seeking an advanced level of preparation in theology. The next category, M.A. in (Special) is the professional M.A. two-year program which helps prepare people for a specialized ministry in contrast with the Master of Divinity (M.Div.) which is a basic three-year program of general preparation for the full range of ministry. The professional M.A. is always qualified in its title by the area of specializations, e.g., M.A. in Pastoral Counseling. Please note that as in Table 2.10, the Professional three-year and four-year post-baccalaureate have been combined.

Table 2.20A: Enrollment Summary by Degree, Gender, and Race—HC

This table presents in summary form enrollment by gender and race in all the major categories of programs and in the specific degree and nondegree programs as reported by member schools in the ATS Annual Report Forms for fall 1991. The data are taken from the section entitled Enrollment (EF-1) of the Report Forms. These tables present only the broader categories of degree and nondegree programs. The revised 1988 Annual Report Forms and all later forms provide a separate category for Non-Resident Alien or Visa students, which did not exist in earlier years. This group constituted 7.5 percent of total head count enrollment for the fall of 1991. In prior years they were simply grouped as "all others," because the distinction was not as clearly drawn as at present. The discrepancy in total enrollment figures is because two schools do not give us a racial breakdown of students.

Definitions: The fall 1988 through 1991 ATS Annual Report Forms have followed the definitions of race/ethnic identification found in *A Common Language for Postsecondary Accreditation* published by NCHEMS and COPA.

a) Black, Not of Hispanic Origin. A person having origins in any of the Black racial groups of Africa.

b) Hispanic. A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin, regardless of race.

c) Asian or Pacific Islander. A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian Subcontinent, or the Pacific Islands. This area includes, for example, China, Japan, Korea, the Philippine Islands, Samoa, India, and Vietnam.

d) American Indian, Alaskan Native, or Inuit. A person having origins in any of the original peoples of North America and maintaining cultural identification through tribal affiliation or community recognition.

e) White Not of Hispanic Origin. A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.

f) Nonresident Alien or Visa. A person who is not a citizen or national of the home country of the institution and who is in the country on a visa or temporary basis and does not have the right to remain indefinitely.

Comparable Data:

Women: The 18,103 women enrolled (HC) in the ATS membership in the fall of 1991 constituted 30.1 percent of total enrollment and an increase in numbers of 3.3 percent from 1990. In 1974 there were 5,255 women or 14.3 percent of total enrollment; and in 1979 there were 10,204 women or 21.1 percent. There has been a steady growth in numbers and percentage every year. 1991 reflected a greater growth in numbers (+602) but only a .4 increase in percentage of total enrollment. The highest increase in enrollment is in the M.A. (special) followed by the M.Div. program.

Blacks: The 4,671 Blacks (HC) enrolled in the ATS membership in the fall of 1991 constituted 7.8 percent of total enrollment, an increase of .7 percent from 1990. In 1974 there were 1,246 Black students enrolled, or 3.4 percent; in 1979 there were 2,043, or 4.2 percent. The years since have seen a steady growth in Black enrollment which averaged +7.0 percent per year for the past 5 years. The year 1991 reported a growth of 368 students, 7.9 percent more than in 1990. 284 of those students are in the M.Div. program; 147 in the certificate program. There is still a great need to encourage African Americans into Ph.D. programs to provide faculty for theological seminaries.

Hispanic Americans: The 1,625 Hispanic Americans enrolled in the ATS membership in the fall of 1991 constituted 2.7 percent of total enrollment, a decrease of 17.2 percent from 1990. In 1974 there were 448 Hispanic American students, or 1.3 percent of total enrollment; in 1979 there were 322, or 1.7 percent of total enrollment. The years since have seen in most instances a steady but slow growth in the enrollment of this group. The difference between 1990 and 1991 is almost solely due to the shift of a certificate program from one of our member schools to a denominational headquarters unit. This shift shows the importance of not only looking at numbers but numbers within degree programs. With projected demographics about the rising Hispanic population in the United States, the disparity between the number of trained church leaders and congregations is enormous. With only 2.7 percent of total enrollment this group still remains sorely underrepresented in member schools, which calls for serious reflection.

Asian/Pacific Islander: The 2,653 Pacific/Asian students enrolled in the ATS membership in the fall of 1991 constituted 4.4 percent of total enrollment, an increase of 8.1 percent from 1990 In 1979 there were 577 Pacific/Asian students enrolled, or 1.2 percent of total enrollment. The early intervening years showed a very rapid growth in the enrollment of this group which averaged 14.2 percent per year. 1990 showed an increase of 18.1 percent. The determination of this group to provide for itself an educated ministry is obvious in these statistics. Again, it may not be sufficient to address the population demographics as a whole as increases are primarily in the D.Min. and Certificate Programs.

Table 2.23: Denominational Affiliation of Current Enrollment—HC

This table reports the denominational status of enrollees in two categories. The first is "First Professional Degrees" which includes all those who are enrolled in the basic three- or four-year first professional degree programs which in most, but not all, denominations lead to full-time ordained ministry. This category includes enrollees reported on the ATS Annual Report Forms for 1991, EF-1, page 2, columns A through I. The category also includes interns reported on EF-1, page 4, columns E and F, where interns are reported if they are in programs under the supervision of the school and the internship is integral to the completion of the degree program. The other category, "All Others," embraces all students enrolled in other programs whether other degrees, certificates, diploma programs, or special/unclassified. The number of schools in which students are enrolled in each category are listed in the column to the right of that category. The last column lists the number of unduplicated schools in which students of that denomination are listed.

The number of denominations listed in current editions of the ATS *Fact Book* is more extensive than those listed before 1988. The expanded listing better represents the diversity of membership in the Association. The purpose of a separate listing of those enrolled in first professional programs for full-time ministry, whether degree or nondegree students, is to offer the denomination as accurate an accounting as possible of the number enrolled from that denomination who would be preparing for full-time ministry. The difference in H.C. reflects four schools which did not report denominational breakdown.

Table 2.27: HC/FTE Enrollment by Individual Degree Programs: Total Enrollment Per School/ Per Degree

One of the most widely used tables from the pre-1988 *Fact Book* was Table B-2 Enrollment by Individual Degree Program. Table 2.27 brings back that information to provide a better understanding of the range of degree programs offered by schools.

Table 2.29: Total Completions from Member Schools

This table reports the number who have completed degree programs and were graduated from all member schools. This includes all U.S. and Canadian schools, both accredited and nonaccredited. The statistics record completions for the "number of schools reporting" for each year. There is a slight difference in the number of schools which reported enrollment data from the number actually reporting completions. Statistics for Tables 2.29 and 2.32 are taken from the Completions form (C-1) of the ATS Annual Report Forms for fall 1989 through 1991. The table is intended to offer a three year trend with regard to completions. The M.Div. category includes all those graduating with this degree as reported in C-1, page 2, columns C and D, together with those who received the M.Div. upon completion of their internship as reported on page 4, columns E and F. The Th.D., S.T.D., and Ph.D. degree completions are reported again on C-1, page 5, columns C, D, E, and F. The Doctor of Ministry completions are reported on C-1, page 3, columns A and B. The category "others" includes all the M.A. level program and the other doctoral level program completions.

The gradual decline in the number of graduates from the M.Div. program which was first observed in 1985 has continued through 1991 with a reported decrease of 228 graduates in 1990 and 277 in 1991. The year 1991 shows the first decline in the number of Doctor of Ministry graduates in five years. In a simliar fashion this is also the first year to report a drop in academic doctoral graduates. This may reflect the tight economic conditions with more and more students postponing programs or attending on a part-time basis. In the past decade the range has varied from between 950 and 1,025 per annum. The reader may wish to compare Table 2.29 on completions with Tables 2.04A and 2.04B which report both head count and FTE enrollment in the same categories and with the same format.

Completions by Degree

Table 2.32: Completions by Degree Programs

This table reports completions by individual degree programs together with the certificate and diploma programs. Both the format as well as the program categories and degrees are parallel to those of Table 2.12 which reports both head count and FTE enrollment in the individual degree programs as well as in certificate and diploma programs. All statistics are drawn from the section on Completions (C-1) of the ATS Annual Report Forms for the fall of 1990 and of 1991. Table 2.32 follows in its listing of the categories and programs the same order as was followed by member schools in reporting these data in section C-1 which covers the full range of completions.

CHAPTER III: PERSONNEL COMPENSATION

Introduction

Chapter III consists of seven tables which report data on compensation for administrators and faculty. This information is supplied by the schools in the ATS Annual Report Forms, sections on Salary (S-1 and S-2) for administrative and faculty salaries for the academic years, 1989-90, 1990-91 and 1991-92. The data are reported in detail for the current year 1991-92. Salaries both for administrators and for faculty are reported for the most part in categories and groupings which sound familiar and are parallel to those of prior years. Readers should keep the following in mind:

A. For administrative staff, 21 positions are reported.

B. For faculty salaries the positions of "head librarian-faculty" has been added to the earlier listings, making a total of six positions.

C. Salaries are compared on the basis of size, accredited or nonaccredited status, U. S. or Canadian location, and highest degree level--M.Div./Th.M.; D.Min.; Ph.D./Th.D. They are also compared on the basis of denominational groupings, provided the denomination sponsors four or more schools. The last table compares university/college related and independent/freestanding schools.

D. Salaries are analyzed in terms of contract salary--including contributed services, housing where provided, pension benefits, and other benefits, chiefly medical. A separate comparison is made of contract salaries which include housing and those which do not.

E. The order in which salaried positions are reported is an alphabetical order determined by the computer program. To facilitate the use of these tables, a copy of the glossary of administrative and faculty positions has been appended to this chapter.

Table 3.12A: Trends in Total Compensation Averages—U. S. Accredited Schools

This table reports average compensation for administrators and faculty for U. S. accredited schools only. Averages are for the fall of 1989, 1990 and 1991 salaries. The inflation rate for 1990 was + 4.80 percent. The inflation rate for 1991 was + 4.60 percent.

Sources: Statistics for this report are taken from the Administrative and Faculty Salary sections (S-1 and S-2) of the ATS Annual Report Forms for the fall of 1989, 1990, and 1991. The alphabetical listing of administrative and faculty salary categories follows that of the ATS Annual Report Forms. A copy of the 1991 Glossary is found in the Appendix to this chapter. Total Compensation includes the contract salary, contributed services, housing allowance (if any) or the rental value of housing provided, pension payments, and other benefits such as insurance, medical coverage, and tuition for dependents.

Table 3.13: Trends in Total Compensation Averages—All Nonaccredited Schools in U. S. Dollars

This table reports Compensation Averages for all nonaccredited schools; that is, for all associate and candidate members. Canadian and U. S. schools are grouped together in this table because of the relatively small number of schools whose reports constitute the data base. Canadian dollars have been converted to U. S. dollars at the rate as of July 1 of each of the reporting years: for 1989, $.8412 US; for 1990, $.8645 US; and for 1991, $.8753 US.

The sources of data are the salary forms (S-1 and S-2) of the ATS Annual Report Forms for 1989, 1990 and 1991. The U.S. Consumer Price Index as of July 1, 1991, of + 4.6 percent, was used to calculate the percentage change.

Table 3.17: Compensation With and Without Housing Benefits, Salaries and Other Benefits—All Schools in U. S. Dollars

This table recognizes the variety of salary patterns for the academic year in member schools, some of which include housing benefits and others which do not. The total salary as reported is the sum of several components. The first is that of contract salary which as reported here includes any contributed services if applicable. Contributed services are an equivalent dollar value calculated for services rendered by a person to a school for which no monetary reimbursement is accepted. They may constitute a portion or all of the equivalent contract salary which would normally be paid for a given position. Housing includes a housing allowance or the rental value of housing provided. The caption "Benefit" reports separately the school's contribution to pension, and then other benefits which include life insurance, medical coverage, educational benefits for dependents, auto furnished by the institution, and other benefits paid by the institution. Each category of the components of the total salary reports the average for the number of schools reporting in that category.

The statistics for this table derive from the school reports in the section on salaries (S-1 and S-2) of the ATS Annual Report Forms for the fall of 1991. This table includes all schools accredited and nonaccredited, Canadian and U. S., with Canadian dollars converted to U. S. dollars at the rate as of July 1 of the reporting year. The alphabetical listing of administrative and faculty salary categories follows that of the ATS Annual Report Forms. A copy of the 1991 Glossary is found in the Appendix to this chapter.

Table 3.18: Compensation Comparisons by Size, Accredited or Nonaccredited Status, Country, and Highest Degree—All Schools in U. S. Dollars

This table reports compensation comparisons in terms of contract salary including contributed services, contract salary plus housing, and additional benefits paid by the school. It also details the average and median contract salary, the total average salary and the 25th percentile, median and 75th percentile of the total salary where median stands for the point at which 50 percent of schools are below that point and 50 percent above. No salary is reported if there is only one person reported in a category. If only two or three are reported, the percentile distribution and median are not reported in order to protect privacy of individual salaries.

The categories which are used for comparison are those most commonly used by schools for planning purposes. They include a distribution (a) into six groups by size of school, based on reported FTE enrollment; (b) by the accredited or nonaccredited status of the school (nonaccredited includes associate and candidate members); (c) by country, i.e., Canada or U. S.; (d) highest degree offered--the M. Div./M.Th.; D. Min.; Ph.D./Th.D. Tables 3.19 and 3.21 with comparisons by denominational groupings and by nonuniversity affiliation complement the present table by offering additional bases for comparison.

Statistics are calculated in U. S. dollars with Canadian dollars converted to U. S. dollars at the rate as of July 1, 1991 ($.8753 US). The data are based on the salary section (S-1 and S-2) of the ATS Annual Report Forms for the fall of 1991 which report salaries for the 1991-92 academic year.

Table 3.19: Compensation Comparisons by Denomination of School—Groups with Four or More Schools

This table complements Table 3.18 in that it again reports compensation for administrators and for faculty for comparison purposes, but here it is based on the denominational affiliation of the school. Only denominations with four or more schools are listed. There are 12 groupings--two for Canada and 10 for the U. S. Since the table distinguishes U. S. from Canadian denominational groupings, Canadian dollars have not been converted. Schools declaring themselves as nondenominational or interdenominational U.S.A. constitute a distinct U. S. grouping.

No salary is reported if there is only one person reported in a given category. If only two or three are reported, the percentile distribution and the median are not reported in order to protect the privacy of individual salaries.

The salary information derives from the salary forms (S-1 and S-2) of the ATS Annual Report Forms for the fall of 1991. The country and denominational affiliation are taken from the ATS school master file as reported by the schools themselves.

Table 3.21: Distribution of Administrative and Faculty Compensation in Thousands, Comparing University and Nonuniversity Affiliated Schools

This table presents a comparison of total salary figures in thousands of dollars for university/college affiliated schools and for nonuniversity affiliated schools. The total salary here reported includes contract salary with contributed services if applicable, as well as housing, pension, and other benefits. The comparison is made first for Canadian schools in Canadian dollars and then for U. S. schools in U. S. dollars. The school is considered university or college affiliated if it is constituted as a school or department within the structure of a larger university or college which has at least two other graduate level schools or departments. The university/independent status of all member schools is listed in Table 1.01 of Chapter I.

The data for this table derived from the section on salary (S-1 and S-2) of the ATS Annual Report Forms for the fall of 1991. Salaries are those for the 1991-92 academic year. Faculty salaries are those reported for full-time faculty, contracted on a nine/ten month or eleven/twelve month basis, regardless of the number of payment periods.

CHAPTER IV: FINANCES (TUITION COSTS, REVENUES, AND EXPENDITURES)

Introduction

This section consists of twelve tables which provide the overall financial information for the ATS membership as reported in the fall of 1991 in the ATS Annual Report Forms. They provide revenue and expenditures together with per-student costs for the years 1989-90 and 1990-91 based on the audits of those years and as reported in the fall of 1990 and 1991. Average tuition costs and degree program costs are printed here.

Table 4.01: Tuition and Fees

The data for these tables were submitted by member schools in the ATS Annual Report Forms in the section called Institutional Characteristics (IC-1). Tuition costs and fees are given for the full academic year 1991-92 and are the figures published by the schools themselves. It is important to understand that the low tuition costs listed for Southern Baptist seminaries and some of the Roman Catholic seminaries are due to denominational subsidies of educational programs in those schools. University related schools will generally report higher tuition costs because the divinity school of the university will most often follow the university tuition scale.

Tuition costs are listed for the principle degree programs of member schools, namely, the Master of Divinity (M.Div.) and the academic doctorates (Ph.D./Th.D./Ed.D.) as well as with the Doctor of Ministry program (D.Min.). Costs for the M. of Div. and the academic doctorates assume a full-time student taking the normal course load. Costs for the D. of Min. program are given for the entire program which is designed for a minimum of three years, each year of which will have a different level of academic concentration and correspondingly different tuition costs.

The table includes all member schools both accredited and non-accredited. Canadian costs are in Canadian dollars and U.S. schools are in U.S. dollars. The M.Div. is the basic program of preparation for full-time ministry for almost all the member theological schools. Costs for M.A. programs will generally be in the same range. The academic doctorates will be priced at a different level to reflect the substantially higher costs to the school. The D.Min. serves as the highest professional degree and usually assumes that the candidate is actually engaged in ministry. It will have its own pattern of costs reflecting the extent to which the school is able or willing to absorb the direct or indirect costs of the program.

Table 4.05: Average Tuition Charges

This table reports the average tuition charges for the same three categories of programs as were reported in Table 4.01. The distribution, however, is by the full-time equivalent enrollment (FTE) in each program for six groupings of schools increasing in size. The second distribution is between independent or free-standing schools and those which are an integral part of a university or college. The designation "university-related" is reserved for those theological schools affiliated with a larger school which has at least two graduate level schools or departments. These tables include all member schools, both accredited and nonaccredited. Charges are reported in U. S. dollars with Canadian dollars converted to U. S. dollars at the rate for the reporting period as of July 1 of the reporting year.

This table is a two-year table with a report of the percentage of change from the previous year. The statistics are taken from the ATS Annual Report Forms, the section entitled Institutional Characteristics (IC-1). It is interesting to note the higher charges of the university related schools which frequently follow the university scale. The category of schools over 1,000 includes several of the major Southern Baptist schools with heavily subsidized tuition.

Table 4.08: Revenue and Expenditures Per FTE Student

A matter of constant concern to theological school administrators and to denominational offices is the per-student cost to prepare professional leadership for the churches. These costs are normally calculated on the basis of the number of full-time equivalent students. The FTE enrollment serves as a better base than the head count enrollment which will include a varying percentage of part-time students.

Tables 4.08, 4.10, 4.14a, 4.23, 4.25, and 4.26 all report the FTE financial data either in terms of dollar costs or percentage costs by the different line items together with the total costs. Only Current Fund revenue and expenditures are reported in these tables.

Table 4.08 reports both revenue sources and expenditures per FTE student for all students attending ATS member schools. The figures are reported in the fall 1991 ATS Annual Report Forms, the section entitled Finance (F-1), based on the audited figures for the 1990-91 academic year. Please note the following:

A. Each source of revenue and each line item for expenditures is reported with the average amount for the number of schools reporting a non-zero amount for that line. The number of schools reporting is clearly indicated.

B. Please note that the total per-student revenue and the subtotal per student educational and general expenditure, together with the total per student expenditure, are likewise based on the number of schools reporting. If the average amount for each line item were based on the total 211 schools reporting, the amount would obviously be less. In our judgment the reporting of the individual line averages for the schools reporting non-zero amounts for that line is of more interest to schools doing comparative analysis of their own revenue and costs.

These statistics are again based on the fall 1991 Finance (F-1) forms of the Annual Report Forms. Total revenue reflects F-1, Part A, Line 9. Subtotal educational and general expenditure reflects F-1, Part B, Line 14. The total expenditures reflects F-1, Part B, Line 18. Most comparisons of per-student costs are based on the FTE costs of educational and general expenditures. Most schools try to have auxiliary enterprise expenditures covered directly by revenues from their operation. For a good number of schools which do not provide residence or food services, auxiliary enterprises are not a significant expense line.

C. Revenue and expenditures are recorded in U. S. dollars. Canadian dollars have been converted to U. S. dollars as of the exchange rate as of July 1.

D. The line items for revenue and expenditures follow the guidelines of the National Association of College and University Business Officers (NACUBO), with the exception that the ATS Annual Report Forms call for a separate reporting of library expenditures from the category of academic support of the NACUBO guidelines. It has been the long-standing practice of ATS to use this as one way of monitoring the graduate level institutions which constitute its membership. Table 4.10: Revenue Sources Expressed as a Percentage of Total Revenue—All Schools

This table provides a distribution of revenue for each line item as a percentage of total revenue. The percentage for each line item is based on all ATS member schools. Data are recorded for three years, the fall of 1989, 1990, and 1991. It represents audited financial reports for the three prior fiscal years, 1988-89,1989-90, and 1990-91. Previous editions of the *Fact Book* provided comparable data in dollars but not in percentages. For purposes of strategic planning, the percentages of the several line items are significant.

The reader can readily convert the percentage to dollars by multiplying the total per FTE student revenue from Table 4.08 ($16,422) by the percentage in each line item. The source of data for this table is the same as for Table 4.08. All data are reported in U. S. dollars with Canadian dollars converted to U. S. dollars at the rate as of July 1, 1991.

Table 4.14: Revenue Sources as a Percentage of Total Revenue—Roman Catholic and Non-Roman Catholic Schools

This table provides a separate distribution of revenue sources for Roman Catholic theological seminaries and for Non-Roman Catholic schools. The separate tables reflect the average higher percentage of contributed services in the Roman Catholic schools and lower percentage of endowment income. Contributed services are often referred to as "living endowment." It is interesting to note that contributed services plus endowment in the Roman Catholic schools comes to almost the same percentage of revenue as endowment income in the other theological schools. The source of the data for this table is the same as for Table 4.08.

Table 4.23: Expenditure Sources as a Percentage of Total Expenditures—All Schools

This table provides a distribution of expenditure sources as a percentage of total expenditures. The expenditures include both mandatory and non-mandatory transfers in the total educational, general, and auxiliary enterprise expenditure categories. The data are presented for three years for the sake of comparisons. Data are calculated from the Finance (F-1) section, Part B, Current Fund Expenditures for the academic years 1988-89, 1989-90 and 1990-91 as reported in the fall of 1989, 1990 and the fall of 1991. The table includes all ATS member schools. Canadian dollars have been converted to U. S. dollars in the calculations. The reader can readily convert the percentage to dollars by multiplying the total per FTE student expenditures from Table 4.08 ($16,278) by the percentage in each line item.

Table 4.25: Expenditure Sources as a Percentage of Total Expenditures—Roman Catholic and Non-Roman Catholic Schools

This table is based on the same data as the previous Table 4.23, but offers a comparison, of Roman Catholic and non-Roman Catholic schools. The table reflects higher proportionate costs in Roman Catholic schools for plant operations. With smaller enrollments and larger residential facilities, the operating costs for these schools tend to be higher. Student services are also higher for Roman Catholic schools and reflect the more intensive formation programs.

Table 4.25 includes all ATS member schools. The source of data is the ATS Annual Report Forms, the section on Finance (F-1), Part B, Current Fund Expenditures, for the fiscal year 1990-91 as reported in the fall of 1991.

Table 4.26: Average Educational and General Expenditure Per FTE Student

This table provides the average educational and general expenditures per FTE student. It includes both mandatory and non-mandatory transfers from the current fund but it does not include auxiliary enterprises. The listing is important in that it describes Canadian costs in Canadian dollars. It also distributes costs (a) according to six groupings based on the size of FTE enrollments; (b) according to whether the school is related to a university or college or is independent; (c) by Roman Catholic and non-Roman Catholic theological schools. Per student costs are based on the school costs as reported in the ATS Annual Report Forms, the section on Finance (F-1), Section B, Current Fund Expenditures, Line 14, for the 1989-90 and 1990-91 fiscal year as reported in the fall of 1990 and 1991. It includes all ATS member schools. What is immediately obvious is the relatively higher per student costs for the smaller schools.

1991	$670566	$664671	$5,895

Table 4.28: Trends in Total Financial Data--All Schools

This table represents audited financial data as reported in the fall of 1989, 1990, and 1991 for the prior fiscal years 1988-89, 1989-90, and 1990-91. It includes all member schools, with Canadian dollars converted to U. S. dollars according to the rate as of July 1 of the reporting year. Please note that this table reports the total current fund expenditures but excludes non-mandatory transfers. Non-mandatory transfers are those transfers from current funds to other fund groups made at the discretion of the governing board to serve a variety of objectives, such as additions to loan funds, additions to quasi-endowment funds, general or specific plant additions, voluntary renewals and replacements of plant, and prepayments on debt principal.

The average for the fiscal year 1990-91 was a positive nine-tenths of one percent (+0.9%). The year 1987-88 reported the first +0.4 in overall operations of theological schools since 1974-75. 1988-89 showed a small average surplus of +1.00%. 1989-90, however, brought us back to spending as mentioned above at +0.07%. Schools monitor the growth of revenue and expenditures by comparison with the Consumer Price Index (CPI) for the reporting year. A continuing increased focus on financial planning and fund raising is evident in reports from member schools both in the U.S. and in Canada. The reporting of accurate financial data is a difficult task. Each school has its own process of accounting, and consistency across school lines is not apparent. The data in Table 4.28 is not the same as last year. With the input of late forms and clarified information, the percentages have shifted from a deficit to a surplus.

Table 4.29: Ratio of Surplus or (Deficit) to Total Revenues--All Schools

This table uses the same data as the previous Table 4.28 again excluding non-mandatory transfers from the calculation of total current fund expenditures. This exclusion improves the situation of the school in that it lowers the reported expenditures and thus reduces the overall deficit. In this way the school is not penalized for voluntary transfers from its current fund. The table includes all member schools. The table distributes the ratio of surplus or (deficit) to total revenues on a percentile scale so that the median represents a point where half of the institutions are above and the other half below the median ratio.

Table 4.30: Ratio of Net Educational and General (E & G) Surplus or (Deficit) to total E & G Revenues—All Schools

This table reports only the Net E & G revenue and expenditures which is the most commonly used basis for evaluating the overall health of an institution together with the level and adequacy of support in relation to its programs. It probably reflects best the fiscal health of the institution. The table distributes the ratios on a percentile scale. The calculation of net educational and general revenue and expenditures does not include auxiliary enterprise revenue or expenditures, nor does it include non-mandatory transfers from the current fund. The data is taken from Parts A and B of the Finance section (F-1) of the ATS Annual Report Forms for the fall of 1989, 1990, and 1991, reports based on the audited figures of the previous fiscal years 1988-89, 1989-90, and 1990-91. Data is given for all member schools. The continuation of a deficit in the median column and elsewhere reflects a growing constraint on budgets in member schools and is a matter of concern.

Table 4.33: Endowment Assets in U. S. Thousands at Market Value—All Schools

This table offers a distribution on a percentile basis of the market value of endowment funds for all schools as reported in Part F of the Finance Section (F-1) of the ATS Annual Report Forms. Endowment market value for the end of the fiscal year is the basis for the table. The table includes only the schools which reported endowment for the given years. The number of schools is reported in the table for each year. For most percentiles, 1991 indicates an upward trend, but that may only reflect an increase in the number of schools.
